

THE BEST IN THE WORLD

ARE BEST—IN THE WORLD

Annual Report of the Fisheries Department Just Issued.

The Enormous Development of the Industry in Forty Years—15,000 Men Earn Their Living by Catching the Fishes of the Coast—British Columbia Salmon Record Broken in 1907 by Long Odds—House Records Sitting To-day.

Ottawa, March 1.—The annual report of the Fisheries Department has been issued. Canada's Fisheries are the most extensive in the world. The coast of the east is given as 5,600 miles, and that of British Columbia as 7,180 miles, or more than double that of Great Britain and Ireland. While the salt water in-shore area, not including indentations, covers

more than 1,500 square miles, the freshwater fishery of the Great Lakes, which belongs to Canada, is computed at 72,700 square miles, not including the numerous lakes of Manitoba and the Northwest Territories, and with excellent species of good fish.

In 1857 it was estimated that the salmon catch in the Great Lakes was one and a half millions. In 1897 they had reached \$20,100,000, an increase of \$29,800,000 in value compared with the previous year.

The Different Species.

The salmon catch shows an increase of over a quarter of a million since the year 1897. The catch of the other species of the salmon catch fell off somewhat.

Between the years 1890 and 1895 the following species of salmon were caught in the fisheries have yielded as follows: Coho, \$106,422.217; herring, \$45,374,042; lake trout, \$10,400,000; steelhead, \$45,730,470; mackeral, \$27,569,125.

Over 75,000 men were engaged in the fishery industry in the past year, aggregating 1,200 fishing steamers and tug-boats, three-quarter million dollars. It yields the 1,200 fishing steamers and tug-boats, valued at \$1,200,000, and 75,000 men engaged in 35,000

boats valued at over a million dollars. He built the sea for a livelihood, using also as a source of income the sale of fish and shellfish.

The lobster plant for 1957 announced a total catch of 1,114,139. This represents the 66th consecutive year that the lobster plant has been operating. The plant has 10 cannery establishments dispersed throughout the state. The plant has 100 boats and 100 traps required to keep them going all year. Over 11,000 persons find employment in this branch of the industry alone.

James H. Vincent, president of the Maine Lobstermen's Union, said that the state's taking advantage of the mussel industry has been nearly fifty per cent less than during the season of 1956. Only one shrimp boat was made in the state. About 100 boats were made in the state and were successively distributed in the state. About nine ninety millions of which were young ones, were made in the state.

boats.

the last five years the value of the

The Canadian fisheries has but slightly varied above twenty million dollars. It is estimated that the salmon taken in British Columbia valued at 40,000,000 pounds for the season, far beyond the records of any previous year.

ORATORS TO RESUME TO-DAY.

Mr. Sempie Has the Floor for the Yukon Bill Debate.

The House of Commons meets to-day when the debate on the Yukon Railway bill will be continued by Mr. Sempie. In some quarters the opinion has been expressed that a division would be required by Thursday of this week, but this entirely out of the question. If the discussion terminates by March 10, it is probable that the bill will be passed.

The Government has been advised that the British sugar ship *Egeria*, now at Esquimaut, B.C., will in April begin to discharge the sugar cargo consigned to inland and the B. C. coast north of Wrangell. She was commissioned last year for this work, which is to be done by order of the Imperial naval authorities. It is hoped that this time, considering the rush of traffic to those waters, she will be greatly appreciated.

OIL SERVANT SUPPLEMENTED.
An Order-in-Council has been passed appointing George Stanger as assistant Indian Indian Reserve Commissioner at Victoria. The duties of the office will now hereafter performed by Mr. Vowell. It was announced last week that Mr. O'Reilly has seen long and honorable service under the Imperial, Dominion and Provincial Governments. He was formerly Commissioner in Cariboo under the Imperial Government. When British Columbia became a part of the Dominion, and in all has been 40 years in the public service.

The First Re-Election.
Returning Officer Eugene Russell has issued his proclamation for the election in the County of Russell. Nomination fixed for Friday, March 11, and pollings

The Supreme Court will take up the Ontario list on Wednesday of this week. William McKenzie is here to watch Yukon Railway matters.

GEO. WHITTINTON

This image shows a vertical strip of a document page. On the left side, there is a dark, textured binding or edge. The main part of the image is a light-colored, slightly mottled surface, likely the paper of the document. There are some faint, dark, irregular marks and smudges scattered across the page, particularly near the top and bottom edges. No legible text or distinct figures are visible.

Shoes for Show.

Made to look well in a window—made for anything but comfort. Such are the kind that please your eyes at the expense of your feet. The shoe which does not fit your foot the first time you wear it promises little comfort for the twentieth. It costs more money to secure the foot of the Slater Shoe than for some entire shoe stocks. That's why they promise more foot comfort, wear and appearance, than other shoes. "Slater Shoe" is on the sole \$5.00, \$4.00, \$3.00 per pair.

The Slater Shoe.

Fat is absolutely necessary as an article of diet.

If it is not of the right kind it may not be digested. Then the body will not get enough of it. In this event there is fat-starvation.

Scott's Emulsion supplies this needed fat, of the right kind, in the right quantity, and in the form already partly digested.

As a result all the organs and tissues take on activity.
